PERSONAL PROJECTS

Space API Website
- React.js, Node.js, CSS
- Used 3 API's to display data on the site

ParkingU
- React.js, Node.js, CSS, Express, Mongoose, MongoDB, Git
- Fully CRUD, Fullstack React.js app within a group of 3
- I created the server/database, the routes/models, connected the HERE maps API, saved their data to my database, made button functionality, helped make the app responsive

Juan-Garnize Flores Photograpy Site
- React.js, Node.js, CSS, Express, Mongoose, MongoDB , Google Firebase Storage
- Created a demo photography website, that has an admin page where the user can upload media and see forms submitted
- User Auth/Protected Routes

Axios TODO list
- Responsive Asynchronous Todo list- Get , Post, Put, Delete using Axios and Rest ful API integration
- JavaScript, HTML, CSS
